

WIN THE BATTLE AND THE WAR

21-22-4 FERTILIZER WITH MESOTRIONE

ATTACK WEEDS WITH AN UNMATCHED COMBINATON

Tackling your renovation or seeding project can feel like an uphill battle against weed competition.

Take the fight straight to the weeds with 21-22-4 Fertilizer with Mesotrione. This unique combination of fertilizer and herbicide eliminates grassy and broadleaf weeds while providing a high-quality, homogenous starter fertilizer to promote seedling germination and rapid establishment.

21-22-4 FERTILIZER WITH MESOTRIONE

ABOUT MESOTRIONE

No other product has the weed control spectrum of Mesotrione, which suppresses many of the most troublesome pre and post-emergence grassy and broadleaf weeds, allowing new turf seedlings to thrive.

Mesotrione is based on a naturally-occurring compound that inhibits photosynthesis in susceptible plants. It is absorbed by plants through the roots, shoots, and leaves, allowing sunlight to destroy the chlorophyll and bleaching susceptible weeds. This bleaching typically occurs within a week of application, killing weeds and allowing desirable turf to recover after several weeks.

Primary weeds controlled by Mesotrione include:

- Crabgrass
- Yellow woodsorrel
- Chickweed
- Buckhorn plantain
- Hairy bittercress
- Dandelion
- Clover

Weeds NOT controlled by Mesotrione include:

- Sedges
- Poa annua

For a complete list of controlled weeds, consult the product label.

PRODUCT OVERVIEW

Product Code	ASP21WMSFE4
Product Description	21-22-4 / 0.08% Mesotrione
Size	SGN 135
N Source	Urea and methylene urea

APPLICATION AND COVERAGE

This product is packaged in a 40 lb. poly bag and has a typical use rate of 187 lbs./acre, which applies the target rate of 0.15 lbs. of Mesotrione.

Product should not be applied within seven days of organophosphate- or carbamate-based insecticide products, including DuoCide®.
