

Newly Planted TREE WATERING GUIDE

PLANTING MONTHS

Spring	APRIL and MAY
Summer	JUNE, JULY, AUGUST
Fall	SEPTEMBER, OCTOBER, NOVEMBER

- Follow the weekly watering schedule for the current year based on the monthly descriptions
- Resume watering (once per week) the following summer. Continue for at least 2 consecutive summers to prevent summer drought stress

Choose either BAG watering or by HAND. Do not do both.

Never water your trees with lawn sprinklers. Doing so will overwater and kill them.

**** The below refill schedule assumes no rain during a week-long period. If we receive a half inch or more of rain in a day, you must let the tree dry out for a few days before resuming the watering schedule.****

HAND WATERING *Use a garden wand with the shower setting, and water all plants at the base - not on the leaves or trunk.*
