

Tropical (Annual) Info Sheet

Tropical Hibiscus Shrub/Tree

- Upright, dense bushy shrub
- Large, showy papery flowers. Attracts butterflies.
- Plant in full sun. Needs extra attention and water in very warm climates and temperatures.
- Fertilize with **Miracle-Gro Bloom Booster (water soluble fertilizer)**
- It is a tropical annual, so it will have to be brought inside for the winter season. Any temperatures below 34 degrees the plant will freeze.

Tropical Gardenia

- Needs acidic, evenly moist soils with excellent drainage and fertility are crucial for plant health and successful blooming. Do not overwater.
- Fertilize with **Miracle-Gro Bloom Booster (water soluble fertilizer)**
- Grows best in full to partial sun and should be provided with good air circulation (prefers shade in the hot afternoon)
- Produces large fragrant double flowers
- Glossy green leaves

Tropical Duranta

- Large, heavy flowering plant. Prefers moist, well drained soil.
- Fertilize with **Miracle-Gro Bloom Booster (water soluble fertilizer)**
- Grows best in full to partial sun and should be provided with good air circulation (prefers shade in the hot afternoon)
- Produces large fragrant flowers
- Be careful in high winds, can be top heavy

Tropical Mandevilla

- Fast growing, heavy blooming vine.
- Prefers moist, well drained soil.
- Fertilize with **Miracle-Gro Bloom Booster (water soluble fertilizer)**
- Grows best in full sun
- Vine types need a trellis to climb onto; shrub types can be planted in a container
