

## THE “TRIPLE THREAT” LAWN REVITALIZATION PROGRAM

*Is your lawn not providing you with that lush, green color you desire? Are you seeing patchy growth due to drought stress or insect damage? Look no further than **Jim Melka Garden Center** as we have the solution you need to bring the life back to your lawn and prevent further damage from insects and weak turf.*

*Follow these 3 steps to **Revitalize, Rejuvenate, and Restore** your lawn back to its prime condition.*

**Step 1: Apply *Andersons 18-12-6 Fertilizer* for instant color, increased root strength, and a greater ability to withstand drought.**

**Step 2: Apply *Andersons Humic DG™* to activate the soil beneath the turf causing the fertilizer to be used more efficiently, while building a stronger plant all the way from root to blade.**

**Step 3: Apply *Duocide Insect Control* as a multi-mode insect deterrent. It is effective for curative treatment of white grubs and well as both preventative and curative control of *surface and sub-surface* feeding insects such as Bill Bug and Chinch Bug.**

Optional applications include **Prophesy Fungicide** if fungal damage is evident in your lawn. Prophesy is a systemic fungicide that prevents and controls *dollar spot, brown patch, red thread* and various fungal diseases in turf and should be applied every 4 weeks from mid-June through August to disease prone turf.
