

LAWN REVITALIZATION PROGRAM AFTER VOLE DAMAGE

ARE THERE LONG TRAILS LIKE THIS IN YOUR LAWN?

HAVE YOU SEEN THIS LITTLE RODENT RUNNING AROUND YOUR PROPERTY?

Follow these steps to Revitalize, Rejuvenate, and Restore your lawn back to its prime condition.

Step 1: Rake up the dead turf and leaf litter from the lawn.

Step 2: Fill the sunken trails with *Scotts Lawn Soil* or topsoil.

Step 3: Apply *Anderson's 18-12-6* to the entire lawn to force the turf to regrow into the bare areas.

Step 4: Apply *Summit 3-D Sod Blend* grass seed to the bare areas. **Please make sure not to apply a pre-emergent herbicide to the seeded areas. Grass seed can also be applied in the fall once the herbicide has been washed from the soil.*

Step 5: Apply *Bonide Mole & Vole Repellent* to deter the voles from your lawn.
